Report course evaluation

Dear Prof. Dr. Prof. Dr. Christian Baun,

this report contains the results of the course evaluation for Master Project AI-Drones to questionnaire type "LVE_sem_e3":

In the first part of the analysis report the values of all individual questions are listed. Then you can find the individual average values of the scales specified in a line.

In the last part are the answers to the open-ended questions.

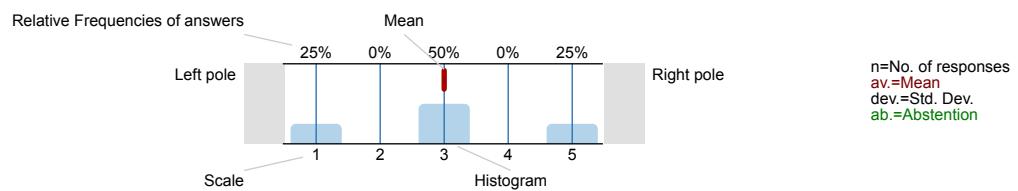

Please let us know if you have questions or suggestions for improvement for the evaluation

Question text

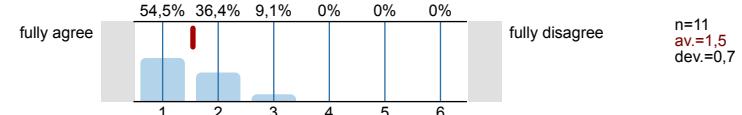

1. Please specify how far you agree or disagree with the following statements concerning this course. Please cross only one box.

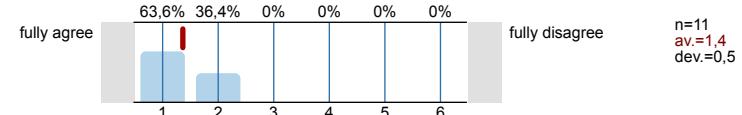

1.1) The structure of the course content is logical/comprehensible.

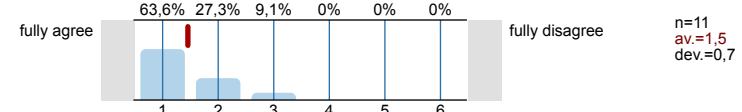

1.2) The lecturer is able to make complex contents comprehensible.

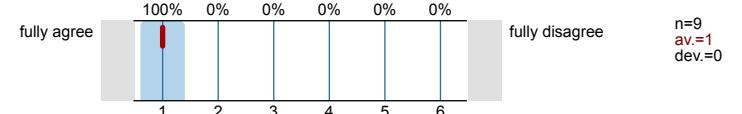

1.3) The course is taught in an interesting way.

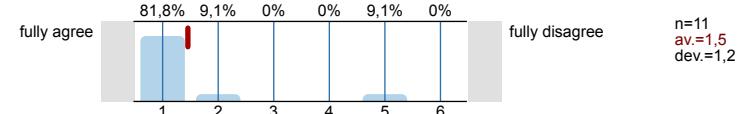

1.4) Discussions are well moderated (stimulation of contributions, thoroughness in answering to contributions, timing, halting of non-stop talkers).

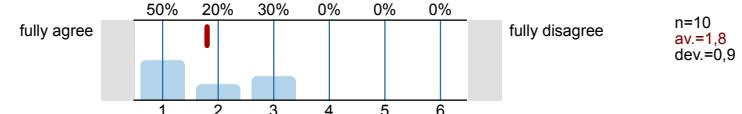

1.5) There is sufficient discussion/ there is enough opportunity for questions.

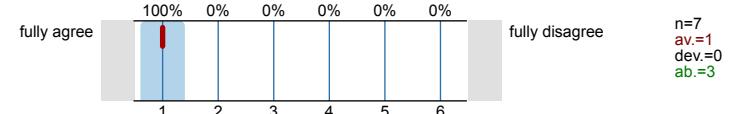

1.6) The course enhances my interest in my studies.

1.7) The accompanying materials (scripts, bibliographies, internet, etc.) are helpful

1.8) The lecturer is sufficiently reachable outside the course times as well.

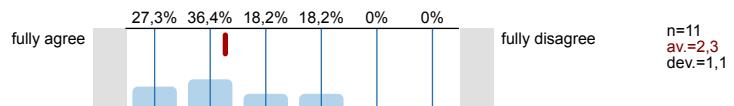

2. Assessment of knowledge gains

The topic of the module/ unit is interesting to me.

2.1) This is my assessment after the module/ unit.

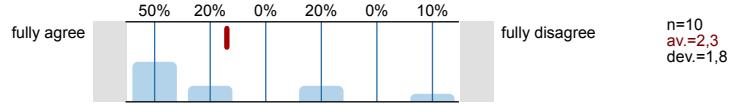

2.2) This is my assessment before the module/ unit.

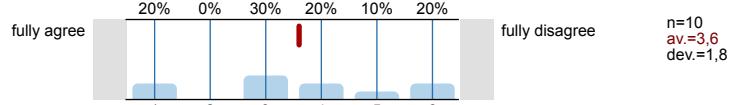

I know a lot about the topic of the module/ unit.

2.3) This is my assessment after the module/ unit.

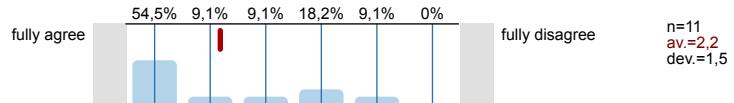

2.4) This is my assessment before the module/ unit.

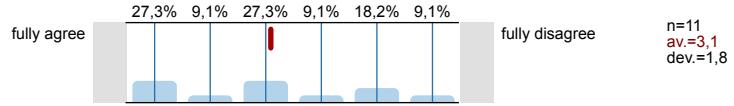

I can apply the content of the module/ unit.

2.5) This is my assessment after the module/ unit.

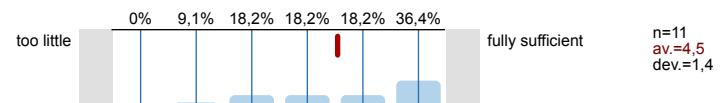

2.6) This is my assessment before the module/ unit.

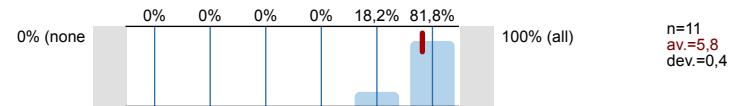

3. Requirements and Workload

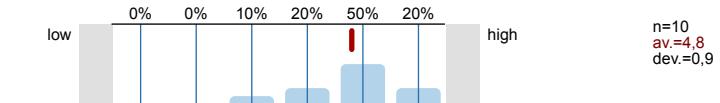

3.1) Was your previous knowledge sufficient to follow the course?

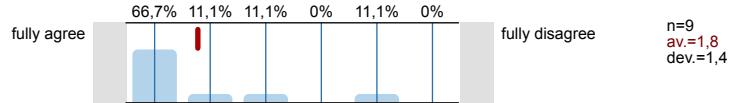

3.2) How many lectures/ seminars did you attend?

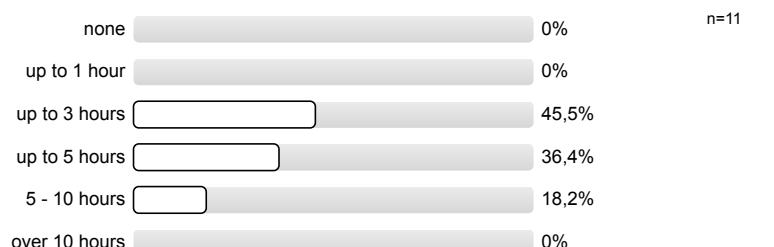

3.3) How would you evaluate the required preparatory work in relationship to the module content?

3.4) The workload corresponds to the ECTS earned in the module/ unit (1 ECTS = 30 hours)

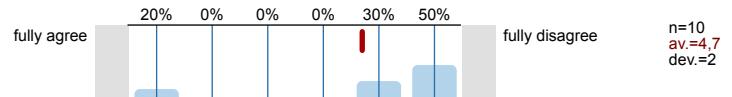

3.5) How much time do you spend per week for preparation and homework for this course?

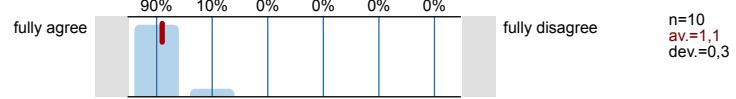

4. Student contribution to the teaching quality and general conditions

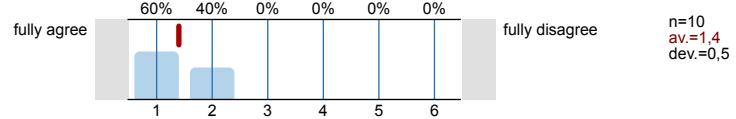

4.1) Fidgeting, chatting, and disturbances of participants interfere with the course.

4.2) The students contributed to a productive working atmosphere.

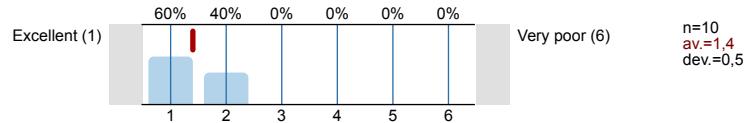

4.3) The spatial conditions of the event are appropriate.

5. A few more things we would like you to tell us...

5.1) Which grade would you give this module/ unit

5.2) Are you an exchange student?

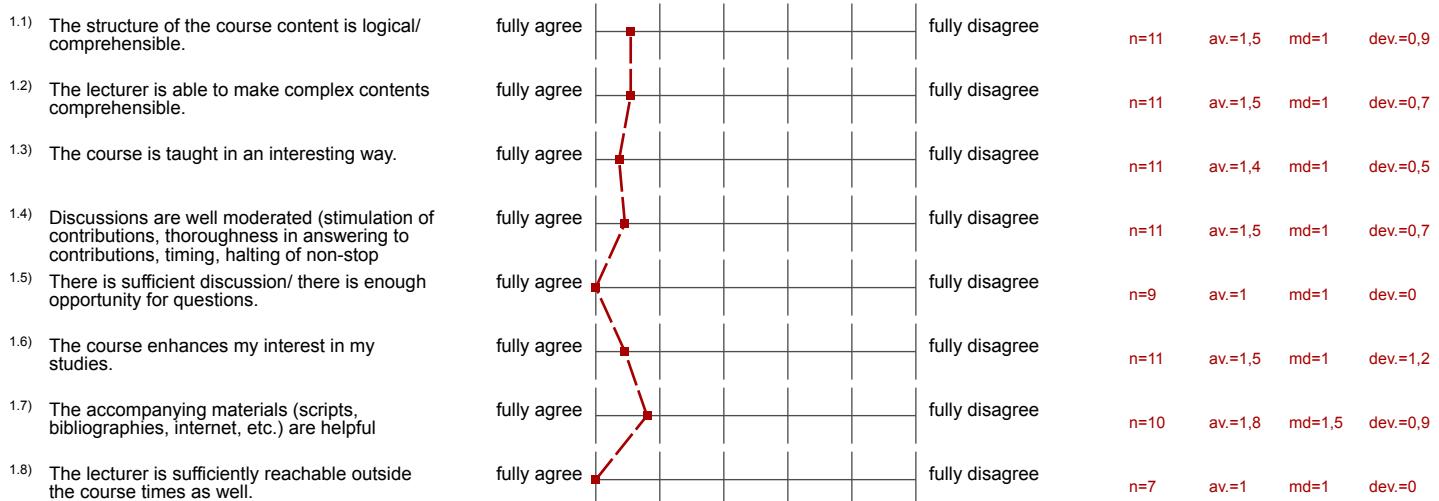

Profile

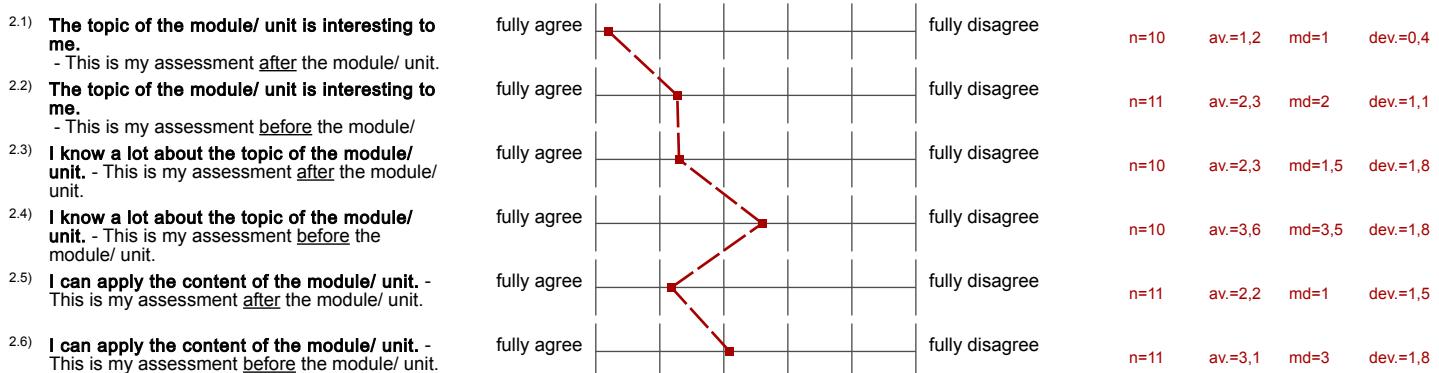

Subunit: Fb 2 LV-Evaluation
 Name of the instructor: Prof. Dr. Prof. Dr. Christian Baun
 Name of the course: Master Project AI-Drones
 (Name of the survey)

Values used in the profile line: Mean

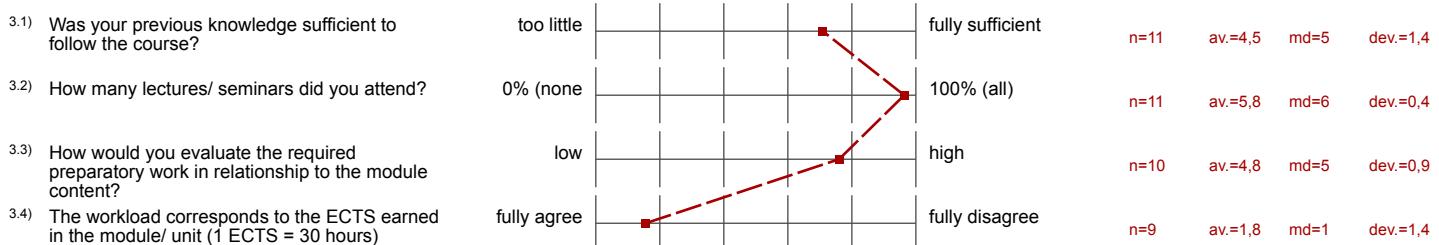

1. Please specify how far you agree or disagree with the following statements concerning this course.
Please cross only one box.

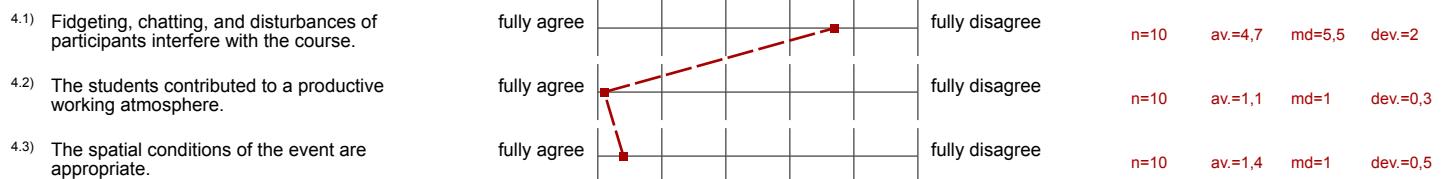

2. Assessment of knowledge gains

3. Requirements and Workload

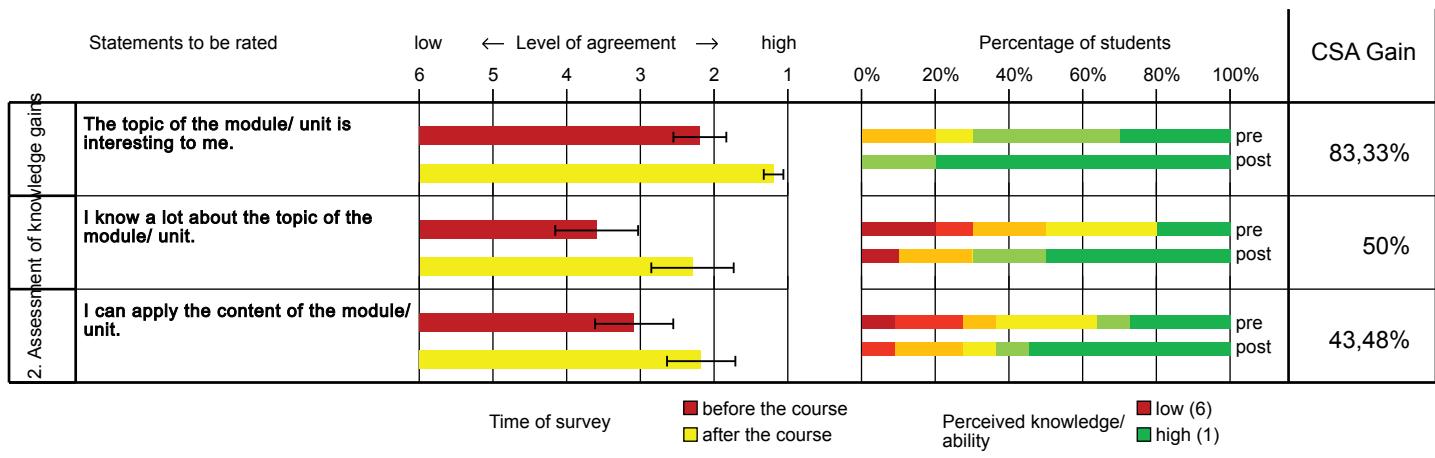

4. Student contribution to the teaching quality and general conditions

5. A few more things we would like you to tell us...

Outcome-based evaluation

Data presentation adapted from Raupach et al. Med Teach 2011; 33: e446-ee453.
Error bars indicate standard errors of the mean.

Comments Report

5. A few more things we would like you to tell us...

5.3) What did you especially like about this course?

	The practice part
--	-------------------

More examples of rules and possibilities	To be able to build a drone and test the software part with an actual hardware project.
--	---

The freedom in approach / choice of solution to build	The is a nice combination of too much practical work, investigation and documentation. and we can immediately experience the visually, what we did.
---	---

This course is really interesting. I have acquired many new technological knowledge specially hardware and software synchronization. FPV is really fun and challenging. AI integration is also very interesting.
--

5.4) Your suggestions for improvement:

	No suggestions at all.
--	------------------------

More specifications and an actual goal for the project.	It would be better if we could have people from drone industry come to us and give us their or some of their experience.
---	--

Adopting more sensors like LIDAR, BAROMETER to be improving Autopilot feature. it will be more effective.
--
