PROFESSIONAL PROPELLER SOLUTIONS PROVIDER

GEMFAN HOBBY CO.,LTD

Ningbo GEMFANHOBBI Co., Ltd., under the brand "GEMFAN," is a comprehensive enterprise that integrates R&D, design, production, and marketing, providing drone propeller solutions. It is one of China's most professional drone propeller manufacturers.

The core team has long conducted in-depth research on drone structures and aerodynamic performance, consisting of seasoned professionals in composite materials, drone control, and aerodynamics. The company possesses independent R&D and production capabilities in propellers, holding nearly 100 design patents domestically and internationally. Its sales network spans the globe, with products exported to more than 60 countries and regions. The manufacturing facility covers an area of 7,000m², equipped with advanced processing and production machinery as well as propeller performance testing equipment. Refined technology, modern management, and complete production systems provide strong assurance of both product quality and capacity.

GEMFANHOBBI has participated in product R&D projects with numerous professional drone companies worldwide, offering comprehensive propeller solutions. Its designed and marketed products are widely recognized across the drone industry, covering racing drones, aerial photography drones, delivery drones, fruit-picking drones, agricultural drones, and more. The company's self-owned brand, "GEMFAN," has been selected as the official equipment for the National Drone World Championship team and multiple world champion drone racers. With outstanding achievements in the FPV racing propeller sector, the company now holds a 60% share of the FPV propeller market.

Upholding a consistent spirit of rigor and innovation, with professionalism, quality, innovation, integrity, and service as its core values, the company continues to explore the drone industry, optimize itself, and advance deeper research in drone propellers. We are committed to providing global customers with drone power system solutions and contributing to the development of the industry and the low-altitude economy.

R&D ABILITY

Design Ability

Independent ability of research and development, we can design the props according to different applications and usages to meet the needs of different customers.

Performance Test

To make sure meet the design requirements of dynamic balance, efficiency and thrust, we can do repeated propeller data verification and tests.

Intellectual Property

56 design patents.

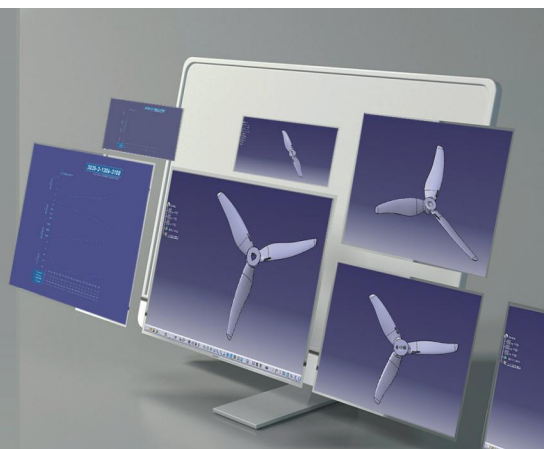

Achievements

GEMFAN props are very popular in the FPV field and always the champion choice in the FPV races. ODM products have assisted many UAV companies in the development of UAV power system, which has become the choice of many UAV companies.
